International association for testing materials

WE have the sad duty of acquainting you with the painful news that our much honored

Vice-President

Professor Dr. Adolf Martens

Member of the Prussian Academy of Science and Director of the R. Testing Office in Berlin-Lichterfelde died on the 24th inst. in his 64th year.

What Professor Martens did for Testing Materials has been added to the wealth of the intellectual world and his name will ever be connected with the progress of technical science.

The International Association for Testing Materials loses in Professor Martens one of its warmest advocates and a friend who was always willing to give it the most valuable assistance. From the day of its foundation Professor Martens has stood by the Association with the fullest devotion and has given it the support of his extensive knowledge and strong personality and until the very last instant has given proofs of his active interest.

The International Association for Testing Materials wish to mark their respect and esteem for the deceased and their gratitude for his work for the Association.

In the name of the Council of the International Association for Testing Materials

E. Reitler,
General-Secretary.

N Belelubsky,
President.

St. Petersburg / Vienna, July 26th 1914.
